### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John Piskorski on September 15, 2005.

The application has been amended as follows: In claim 6, "*the* electroless plating composition" is changed to "*an* electroless plating composition".

In line 1 of the specification, the following sentence is inserted: "This application claims priority to provisional application 60/430,263, filed on December 2, 2002."

### **DETAILED ACTION**

#### ***Allowable Subject Matter***

Claims 1-5 and 7-9 are generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 6, 10 and 11, directed to the species of electroless plating, are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

Art Unit: 1742

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Claims 1-12 are allowed.

The following is an examiner's statement of reasons for allowance: Although the prior art has many examples of techniques for plating bath monitoring and replenishment, the instant claims can be distinguished from these patents. Specifically, all of the prior art is directed towards methods which directly measure the concentration of a specific plating bath component. The prior art does not teach a method in which the concentration of a plating bath component is determined indirectly by measuring the concentration of an inert indicator and then correlating this measurement with the concentration of the bath component of interest. Shalyt *et al.* (US Patent No. 6,890,758) teach a method for measuring the concentration of chelating agent in a plating bath which is analogous to the claimed method. However, the filing date of this patent post-dates that of Applicant's provisional application and therefore cannot serve as prior art.

Art Unit: 1742

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
